Contents

Abe S → Maruyama M
Adelsberger-Mangan DM, Levy WB: Adaptive synaptogenesis constructs networks that maintain information and reduce statistical dependence 81
Aihara T → Tsukada M
Akoev GN → Bedrov YA
Alkon DL → Werness SA
Altman JS → Nützel K
Anastasio TJ, Correia MJ: "Velocity leakage" in the pigeon vestibulo-ocular reflex 235
Awiszus F: Repetitive activity of a branched Hodgkin-Huxley axon with multiple encoding sites 579

Balis UJ, Morris KF, Koleski J, Lindsey BG: Simulations of a ventrolateral medullary neural network for respiratory rhythmogenesis inferred from spike train cross-correlation 311
Bauer H-U → Wolf F
Bauer K → Nützel K
Bedenbaugh P, Gerstein GL: Rectification of correlation by a sigmoid nonlinearity 219
Bedrov YA, Akoev GN, Dick OE: Functional states of an excitable membrane and their dependence on its parameter values 157
Berg AV van den, Buwalda RJA: Source localization in underwater sound fields 255
Bernard C, Ge YC, Stockley E, Willis JB, Wheal HV: Synaptic integration of NMDA and non-NMDA receptors in large neuronal network models solved by means of differential equations 267
Bertram R: Reduced-system analysis of the effects of serotonin on a molluscan burster neuron 359
Beusmans JMH: Computing the direction of heading from affine image flow 123
Bhaumik B → Jayadeva
Blackwell KT → Werness SA
Bowns L, Morgan MJ: Facial features and axis of symmetry extracted using natural orientation information 137
Bressloff PC, Taylor JG: Compartmental-model response function for dentritic trees 199
Buf JMH du: Ramp edges, Mach bands, and the functional significance of the simple cell assembly 449
Bullock D, Grossberg S, Mannes C: A neural network model for cursive script production 15
Bulsara A → Longtin A
Bulsara AR, Maren AJ, Schmera G: Single effective neuron: dendritic coupling effects and stochastic resonance 145
Buwalda RJA → Berg AV van den

Correia MJ → Anastasio TJ

Deemter JH van, Mastebroek HAK: A statistical correlation technique and a neural network for the motion correspondence problem 329
Denier van der Gon JJ → Smeets JBJ
Deuschl G → Timmer J
Diao Y → Li B
Dick OE → Bedrov YA
Dieringer N → Wadan K

Edelman S: Representing three-dimensional objects by sets of activities of receptive fields 37

Fay SD → Werness SA
Ferri M → Verri A
Flotzinger D → Kubat M
Foster DH, Wagemans J: Viewpoint-invariant Weber fractions and standard contour-curvature discrimination 29
French AS, Patrick SK: A nonlinear model of step responses in the cockroach tactile spine neuron 435
Frosini P → Verri A
Fukai T: A model of cortical memory processing based on columnar organization 427

Gantert C → Timmer J
Gasteiger J → Li X
Ge YC → Bernard C
Geisel T → Wolf F
Gerber B, Jakobsson E: Functional significance of the A-current 109
Gerdes VGJ, Happee R: The use of an internal representation in fast goal-directed movements: a modelling approach 513
Gerstein GL → Bedenbaugh P
Grossberg S → Bullock D

Happee R → Gerdes VGJ
Hatsopoulos NG: Is a virtual trajectory necessary in reaching movements? 541
Honerkamp J → Timmer J

Ito K → Tsukada M
Jakobsson E → Gerber B

Jamali N → Liang P
Jayadeva, Bhaumik B: A neural network for the Steiner minimal tree problem 485
Johnson DH → Turcott RG
Joshi A, Lee CH: Backpropagation learns Marr's operator 65
Jüttner M, Wolf W: Stimulus sequence effects on human express saccades described by a Markov model 247

Kato H → Tsukada M
Kien J → Nützel K
Kimura S, Yano M, Shimizu H: A self-organizing model of walking patterns of insects. II. The loading effect and leg amputation 505
Kirschfeld K: Tracking of small objects in front of a textured background by insects and vertebrates: phenomena and neuronal basis 407
Koleski J → Balis UJ
König P → Schillen TB
Krey U → Nützel K
Kubat M, Pfurtscheller G, Flotzinger D: AI-based approach to automatic sleep classification 443

Lee CH → Joshi A
Levy WB → Adelsberger-Mangan DM
Levy WB → Minai AA
Li B, Wang Y, Diao Y: Quantification of directional and orientational selectivities of visual neurons to moving stimuli 281
Li E → Turcott RG
Li X, Gasteiger J, Zupan J: On the topology distortion in self-organizing feature maps 189
Liang P, Jamali N: Artificial neural networks with quasipolynomial synapses and product synaptic contacts 163
Lindsey BG → Balis UJ
Logvinenko AD: Lack of convexity of threshold curves for compound grating: implications for modelling visual pattern detection 55
Longtin A, Bulsara A, Pierson D, Moss F: Bistability and the dynamics of periodically forced sensory neurons 569
Lowen SB → Turcott RG
L'Hôte G → Zytnicki D

Mannes C → Bullock D
Maren AJ → Bulsara AR
Maruyama M, Teraoka T, Abe S: Recognition of 3D flexible objects by GRBF 377
Mastebroek HAK → Deemter JH van
Mates J: A model of synchronization of motor acts to a stimulus sequence. I. Timing and error corrections 463

Mates J: A model of synchronization of motor acts to a stimulus sequence. II. Stability analysis, error estimation and simulations 475
Minai AA, Levy WB: The dynamics of sparse random networks 177
Mizuno M → Tsukada M
Morgan MJ → Bowns L
Morris KF → Balis UJ
Moschovakis AK: Neural network simulations of the primate oculomotor system. I. The vertical saccadic burst generator 291
Moss F → Longtin A

Nicole S, Pessa E: A network model with auto-oscillating output and dynamic connections 275
Niebur E → Wörgötter F
Nienhuis B → Ooyen A van
Nützel K, Kien J, Bauer K, Altman JS, Krey U: Dynamics of diluted attractor neural networks with delays 553

Ooyen A van, Nienhuis B: Pattern recognition in the neocognitron is improved by neuronal adaptation 47
Osowski S: Signal flow graphs and neural networks 387

Patrick SK → French AS
Pessa E → Nicole S
Pfurtscheller G → Kubat M
Pierson D → Longtin A

Richards W, Wilson HR, Sommer MA: Chaos in percepts? 345
Rubinstein J: Pattern formation in associative neural networks with weak lateral interaction 563
Ruppin E, Schwartz EL, Yeshurun Y: Examining the volume efficiency of the cortical architecture in a multi-processor network model 89

Schillen TB, König P: Binding by temporal structure in multiple feature domains of an oscillatory neuronal network 397
Schmera G → Bulsara AR
Schmidt RC, Turvey MT: Phase-entrainment dynamics of visually coupled rhythmic movements 369
Schwartz EL → Ruppin E
Shimizu H → Kimura S
Shinbata H → Tanaka S
Sinkjær T → Slot PJ
Slot PJ, Sinkjær T: Simulations of the alpha motoneuron pool electromyogram reflex at different preactivation levels in man 351
Smeets JBJ, Denier van der Gon JJ: An unsupervised neural network model for the development of reflex co-ordination 417
Sommer MA → Richards W
Soodak RE: Simulation of visual cortex development under lid-suture conditions: enhancement of response specificity by a reverse-Hebb rule in the absence of spatially patterned input 303
Stockley E → Bernard C

Tanaka S, Shinbata H: Mathematical model for self-organization of direction columns in the primate middle temporal area 227
Taylor JG → Bressloff PC
Teich MC → Turcott RG
Teraoka T → Maruyama M
Timmer J, Gantert C, Deuschl G, Honerkamp J: Characteristics of hand tremor time series 75
Tsuchitani C → Turcott RG
Tsukada M, Aihara T, Mizuno M, Kato H, Ito K: Temporal pattern sensitivity of long-term potentiation in hippocampal CA1 neurons 495
Turcott RG, Lowen SB, Li E, Johnson DH, Tsuchitani C, Teich MC: A nonstationary Poisson point process describes the sequence of action potentials over long time scales in lateral-superior-olive auditory neurons 209
Turvey MT → Schmidt RC

Uras C → Verri A

Verri A, Uras C, Frosini P, Ferri M: On the use of size functions for shape analysis 99
Vogl TP → Werness SA

Wadan K, Dieringer N: Abducens nerve responses of the frog during horizontal linear acceleration: data and model 533
Wagemans J → Foster DH
Wang Y → Li B
Werness SA, Fay SD, Blackwell KT, Vogl TP, Alkon DL: Associative learning in a network model of *Hermissenda crassicornis*. II. Experiments *(Erratum)* 95
Wheal HV → Bernard C
Willis JB → Bernard C
Wilson HR → Richards W
Wolf F, Bauer H-U, Geisel T: Formation of field discontinuities and islands in visual cortical maps 525
Wolf W → Jüttner M
Wörgötter F, Niebur E: Cortical column design: a link between the maps of preferred orientation and orientation tuning strength? 1

Yano M → Kimura S
Yeshurun Y → Ruppin E

Zupan J → Li X
Zytnicki D, L'Hôte G: Neuromimetic model of neuronal filter 115
